Understanding the RISEN Framework for Creative Prompts

The RISEN framework provides a comprehensive structure for crafting effective AI prompts by defining five essential elements:

R - Role: Define who the AI should become (advisor, creator, designer)

I - Input: Provide specific information or context

S - Steps: Give clear, actionable instructions to follow

E - Expectation: Describe the desired outcome or deliverable

N - Narrowing: Set restrictions, limitations, or focus areas

This methodology transforms vague requests into precise, actionable instructions that yield superior results.
